Andrew is at the beginning of his 5th semester. His big assignment for the end of the semester is to have a detailed portfolio of all of his assignments throughout this semester in a digital presentation. However, with a majority of his pieces and artworks being on his laptop, and digitally drawn, organization can be tricky.
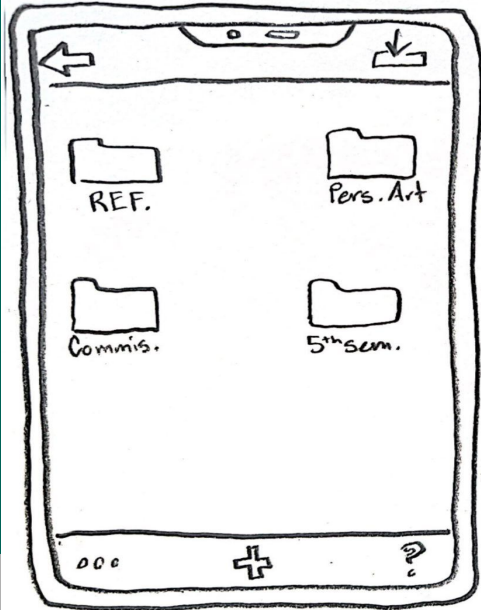

Throughout the semester, Andrew uses the user friendly interface to not only capture his physical and digital artworks, but readily saves them to a folder of his choosing on the app, can edit the image, share, and add another capture.

After creating his "5th Semester" folder, Andrew continues to save all of his artworks on the app and store it in an easy to use manner.

After Andrew is finished with his 5th Semester, he still uses the app for saving all of his reference photos, personal artwork, and commissions in the same space.
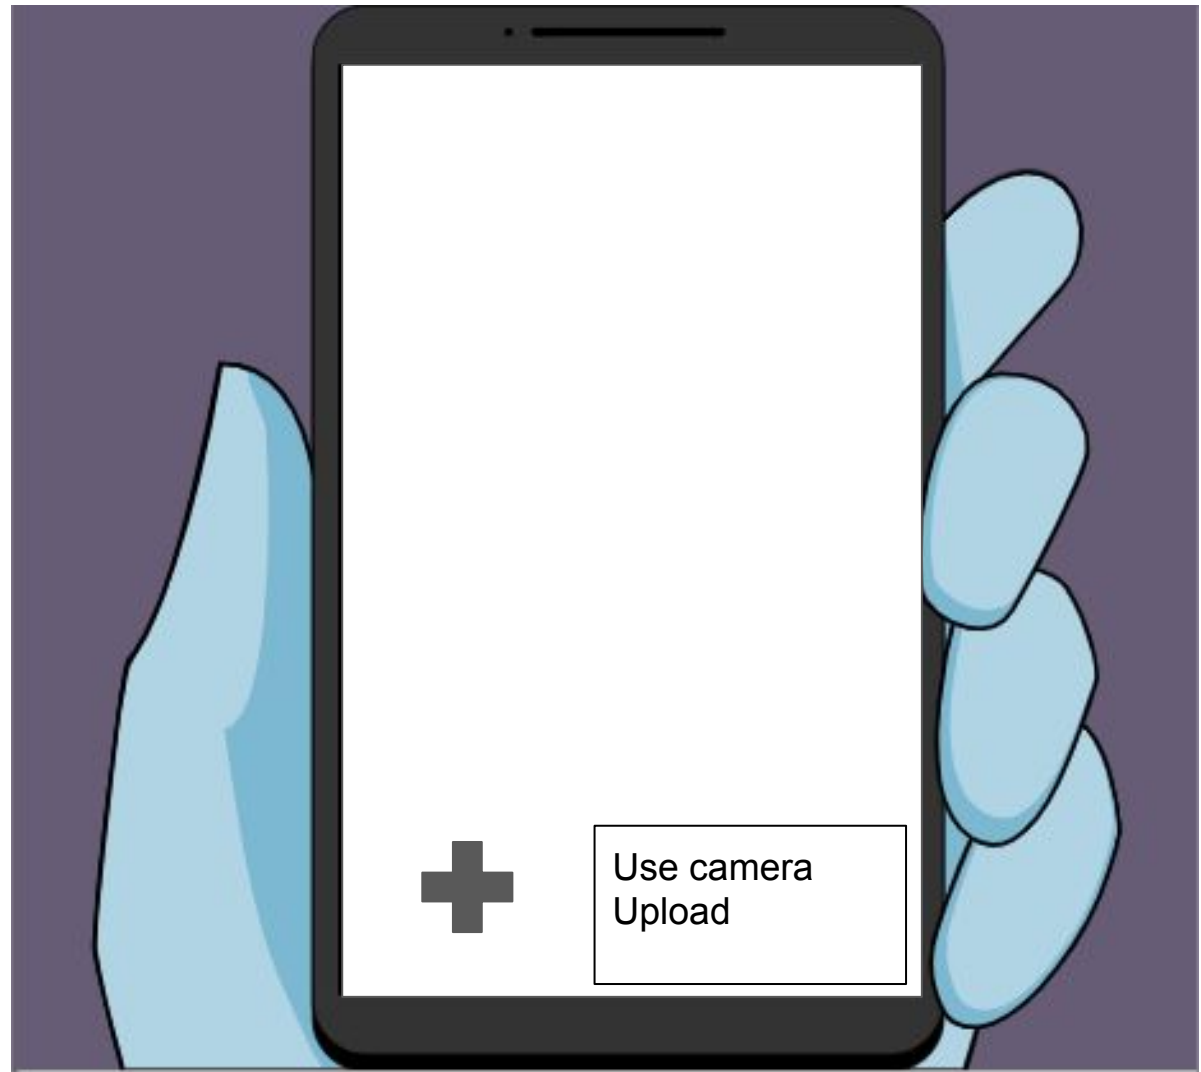

She has the kids create art.

She has the kids put the art on a drying rack for collection.

She creates a new folder on the app and presses the plus sign.

She takes pictures of the kids art.

The kids art is sorted on her phone.
